THE CHAMPLAIN CVD PREVENTION AND MANAGEMENT STRATEGY

The Champlain CVD Prevention and Management Strategy is a five-year plan designed to eliminate disparities in CVD health and make the residents of the Champlain region the most heart healthy and stroke-free in Canada.
Salt:

An extra teaspoon of salt a day boosts heart risk

It increases a person's risk of stroke by 23 per cent and their risk of developing heart disease by 17 per cent, according to a new study.

How Canada is losing the war on salt
Sodium reduction interventions considered to be the most cost-effective way of reducing the burden of cardiovascular diseases.

World Health Organization, 2000
National Sodium Working Group, 2010

Buying pre-seasoned chicken breasts?

Give your head a shake.

And add your own flavour to unseasoned chicken.

Using canned spaghetti sauce?

Give your head a shake.

And buy sauce with no added salt.

Using bottled marinades?

Give your head a shake.

And try olive oil, lemon juice, and herbs instead.

KNOWLEDGE

50% did not identify common high sodium foods.

Cutting sodium: it’s pretty easy when you think about it.
Champlain Cardiovascular Disease Prevention Network
www.giveyourheadashake.ca
Almost half of residents were not able to correctly identify these commonly eating foods as being high in sodium.

- Processed Cheese
- Bottled Salad Dressings
- Canned Vegetables, Tomato Sauces and Pasta Sauces
- Frozen Packaged Meats
- Hamburgers and French Fries
- Ketchup and Mustard
ATTITUDES

Sodium is an important problem…
but it’s not my problem

Cutting sodium: it’s pretty easy when you think about it.

Short Term Impact of Campaign

Awareness
• Respondents from Champlain were more likely than Control District to have seen, read or heard messages.
• 50% of respondents could recall campaign sodium reduction tips.

Knowledge
• Many respondents unable to identify common high-sodium foods.

Actions
• Being aware of the campaign increases intentions to reduce sodium and sodium reduction behaviors.

Cutting sodium: it’s pretty easy when you think about it.

The IRONY

We are now engaged in educational strategies to help the public make their purchased foods safer.

Wouldn’t it be simpler to ensure that foods are healthier at the time of their production?
The NEED

Action to address sodium issues at the first sign that there is evidence that voluntary approaches are delayed.
The CHALLENGE
Addressing through “healthy public policy” approaches contemporary public health challenges...at a time of governmental indifference to the application of classic public health strategies.
Ignorance
Indifference
Inertia
Impatience
Dr. John Snow
