## Action Alert

### Support Ontario Bill 156: IN with calorie info on chain-restaurant menus, and OUT with synthetic trans fats in all restaurants!

On April 9, 2009, a majority of MPPs voted to pass Bill 156 and refer it to the Legislature's Social Policy Committee for public hearings.

This is great news for consumers and public health advocates! But, we have to send a clear message to Ontario law-makers that this bill needs to be promptly considered by the Standing Committee on Social Policy--not shoved to a backburner--and passed.

**FAX YOUR MP**[view campaign list](#)**HELP STOP THE PRODUCTION OF SWEATSHOP CLOTHING**

We can help stop sweatshop production of clothing by requiring that companies disclose information about the names and addresses of their production sites. Proposed changes to the Textile Labelling Act would let us know where our clothes are being made and ensure that we as consumers are supporting companies who are paying decent wages and providing safe and healthy working conditions for their employees.

## WEAK TIES

There is strength in weak ties, as the sociologist Mark Granovetter has observed. Our acquaintances—not our friends—are our greatest source of new ideas and information. The Internet lets us exploit the power of these kinds of distant connections with marvellous efficiency. It's terrific at the diffusion of innovation, interdisciplinary collaboration, seamlessly matching up buyers and sellers, and the logistical functions of the dating world.

**But weak ties seldom lead to high-risk activism.**
