Dear Editor:

A recent article by journalist Nina Teicholz,\(^1\) which was published as a “BMJ Investigation” of the Scientific Report of the 2015 Dietary Guidelines Advisory Committee (DGAC),\(^2\) included numerous errors and misrepresentations. Below we have summarized only factual errors, excluding incorrect or biased interpretations of research. The mistakes are bolded.

Because the “investigation” as a whole is so riddled with errors, we urge the BMJ to retract it, not only to inform your readers, but also to protect the BMJ’s credibility.

1. Teicholz states that “in its 2015 report the committee stated that it did not use NEL reviews for more than 70% of the topics, including some of the most controversial issues in nutrition. Instead, it relied on systematic reviews by external professional associations, almost exclusively the American Heart Association (AHA) and the American College of Cardiology (ACC), or conducted an [sic] hoc examination of the scientific literature without well defined systematic criteria for how studies or outside review papers were identified, selected, or evaluated.”

**Correction:** In Appendix E-2, the Evidence Portfolios for the key topics addressed by Teicholz specify the search strategy, inclusion criteria, search results, and AMSTAR ratings for methodological quality for the existing systematic reviews (SR) and meta-analyses (MA).\(^3,4\)

2. Teicholz states that “instead of requesting a new NEL review for the recent literature on this crucial topic, however, the 2015 committee recommended extending the current cap on saturated fats, at 10% of calories, based on a review by the AHA and ACC, a 2010 NEL review, and the committee’s ad hoc selection of seven review papers (see table A on thebmj.com).” Table A states that “no methodology for this section of the report: no reason given for why certain studies were selected for review and others were not, nor how they were evaluated relative to each other.”

**Correction:** Appendix E-2.43 gives the search strategy, inclusion criteria, search results, and AMSTAR ratings for methodological quality for the seven review papers, along with a list of excluded articles and the reasons for exclusion.\(^5\) (Note: In Table A, Teicholz states that “the overall conclusion [of the 2012 Cochrane review by Hooper, et al.] is therefore

\(^{1}\) [http://www.bmj.com/content/351/bmj.h4962](http://www.bmj.com/content/351/bmj.h4962)

that while saturated-fat restriction appears to reduce heart attack risk, it does not reduce overall or cardiovascular mortality (death), which is arguably the more important endpoint." This statement contradicts Teicholz's article, which said that Hooper, et al. “failed to confirm an association between saturated fats and heart disease.” The BMJ corrected this error a month after it was published.

3. Teicholz states that “use of external reviews by professional associations is problematic because these groups conduct literature reviews according to different standards and are supported by food and drug companies.”

Correction: The “problematic” external review cited by Teicholz was not conducted solely by professional associations. The review was actually a “clinical practice guideline” developed by the American Heart Association and the American College of Cardiology in partnership with the National Heart, Lung, and Blood Institute. The NHLBI’s website clearly describes its rigorous standards for assessing the quality of studies and its policy for managing potential conflicts of interest and relationships with industry.

4. Teicholz states that “in the NEL systematic review on saturated fats from 2010...fewer than 12 small trials are cited, and none supports the hypothesis that saturated fats cause heart disease (see table B on thebmj.com).”

Correction: It is incorrect to state that none of the trials cited in the 2010 NEL review supports the hypothesis that saturated fats cause heart disease. The 2010 NEL review found “strong evidence” that saturated fat intake increases the risk of cardiovascular disease. In Table B, Teicholz over-rules the 2010 NEL review by assigning each trial to one of four categories (a) “trials that should not have been included because they did not meet inclusion criteria,” (b) “trials that should not have been included because they did not test normally occurring [sic] saturated fats or saturated fats at all,” (c) “trials concluding that saturated fats had a neutral [sic] or beneficial effect on health,” and (d) “trials with mixed results on blood lipid measures.” (Note: Table B has additional errors too numerous to list here.) Thus, Teicholz concludes that the 2010 NEL review is substandard, but she also argues that the 2015 “committee’s report used weak scientific standards,” because it did not rely sufficiently on NEL reviews.

5. Teicholz states that “perhaps more important are the studies that have never been systematically reviewed by any of the dietary guideline committees. These include the large, government funded randomized controlled trials on saturated fats and heart disease from the 1960s and ’70s. Taken together, these

---

6 http://www.bmj.com/content/bmj/suppl/2015/09/23/bmj.h4962.DC1/teicholzmast2609.wt1_default.pdf
8 http://www.bmj.com/content/bmj/suppl/2015/09/23/bmj.h4962.DC1/teicholzmast2609.wt2_default.pdf
trials followed more than 25,000 people, some for up to 12 years. They are some of the most ambitious, well controlled nutrition studies ever undertaken.”

**Correction:** It is incorrect to state that these trials were not reviewed by the DGAC. The DGAC considered a 2012 Cochrane review that included 4 of the 6 trials cited by Teicholz and a 2010 meta-analysis that included 5 of the 6 trials cited by Teicholz.9,10 (The review and meta-analysis both concluded that replacing saturated fats with unsaturated fats reduce the risk of heart disease.) One trial cited by Teicholz is excluded from most meta-analyses because it tested a multifactorial intervention including drug treatment for hypertension, counseling for cigarette smoking, and dietary advice for lowering blood cholesterol levels.11

6. Teicholz states that “there have been at a minimum, three National Institutes of Health funded trials on some 50,000 people showing that a diet low in fat and saturated fat is ineffective for fighting heart disease, obesity, diabetes, or cancer.” Two of these trials are omitted from the NEL review....When the omitted findings from these three clinical trials are factored into the review, the overwhelming preponderance of rigorous evidence does not support any of the dietary committee’s health claims for its recommended diets.”

**Correction:** The two trials that were “omitted from the NEL review” did not assess the impact of diet “for fighting heart disease, obesity, diabetes, or cancer.” They assessed the impact of diet on serum cholesterol levels.12,13 Furthermore, all three trials were included in the Cochrane review that was considered by the DGAC.14

7. Teicholz states that "The report also gave a strong rating to the evidence that its recommended diets can fight heart disease....The committee reviewed other, more recent studies but not using any systematic or predefined methods."

**Correction:** Appendix E-2.26 gives the search strategy, inclusion criteria, search results, and AMSTAR ratings for methodological quality for the six "more recent studies," along with a list of excluded articles and the reasons for exclusion.¹⁵

8. In Table D, Teicholz includes sections (under "dietary patterns and heart disease" and "dietary patterns and obesity") entitled "DGAC ad hoc review of the scientific literature" where she states that "no systematic methodology is given for the selection of these studies. It is therefore impossible to know if they fairly represent the literature."

**Correction:** These were not ad hoc reviews. The DGAC details the systematic methodology for selecting these studies in Appendices E-2.26 and E2.27.¹⁶ Note: Teicholz’s Table D¹⁷ consists largely of Teicholz’s criticism of the NEL’s Systematic Reviews on the Relationship between Dietary Patterns and Health Outcomes, published in 2014.¹⁸ Note that Teicholz argues that NEL reviews are substandard, but she also argues that the 2015 “committee’s report used weak scientific standards,” because it did not rely sufficiently on NEL reviews.

9. Teicholz states that “Consulting the NEL for a review on this topic turns up a surprising fact: a systematic review on health and red meat has not been done. Although several analyses look at ‘animal protein products,’ these reviews include eggs, fish, and dairy and therefore do not isolate the health effects of red meat, or meat of any kind.

**Correction:** The NEL reviews cited by Teicholz do examine the results on red meat and processed meats separately from the results on other animal proteins.¹⁹,²⁰,²¹,²²,²³,²⁴,²⁵

¹⁸ http://www.bmj.com/content/bmj/suppl/2015/09/23/bmj.h4962.DC1/teicholzmaster2609.wt4_default.pdf
¹⁹ http://www.nel.gov/template.cfm?template=sort_list_template&key=835
²² http://www.nel.gov/evidence.cfm?evidence_summary_id=250252
10. Teicholz states that “The committee’s approach to the evidence on saturated fats and low carbohydrate diets reflects an apparent failure to address any evidence that contradicts what has been official nutritional advice for the past 35 years. The foundation of that advice has been to recommend eating less fat and fewer animal products (meat, dairy, eggs) while shifting calorie intake towards more plant foods (fruits, vegetables, grains, and vegetable oils) for good health. And in the past decades, this advice has remained virtually unchanged.”

**Correction:** The 2015 DGAC did not recommend “eating less fat” or reducing the consumption of eggs or dairy products. (In fact, Teicholz wrote in a February *New York Times* op-ed that “experts on the committee that develops the country’s dietary guidelines acknowledged that they had ditched the low-fat diet.”26) The *Dietary Guidelines for Americans* has never recommended eating less meat or dairy products. (In some editions, the DGA has included advice such as “moderate your use of eggs” or “use egg yolks and whole eggs in moderation. Use egg whites and egg substitutes freely...”).

11. Teicholz states that “studies showed mixed health outcomes for saturated fats, but early critical reviews, including one by the National Academy of Sciences, which cautioned against the inconclusive state of the evidence on saturated fats and heart disease, were dismissed by the USDA when it launched the first dietary guidelines in 1980.”

**Correction:** The USDA (and DHHS) published the 1980 Dietary Guidelines for Americans in February 1980. *Toward Healthful Diets*, the National Academy of Sciences report cited by Teicholz, was published in May 1980.27 USDA could not have dismissed *Toward Healthful Diets*, because the report was published after the Dietary Guidelines were released.

In summary, the Teicholz/BMJ “investigation” is based on non-facts. Such a paper has no place in the pages of a prominent scientific journal and should be retracted.

Clinical Nutrition and Metabolism
Faculty of Medicine, Uppsala University
Uppsala, Sweden

Lorrene Ritchie, PhD, RD
Director, Nutrition Policy Institute
Cooperative Extension Specialist
University of California Agriculture and Natural Resources
Berkeley, California, USA

Juan Rivera Dommarco, PhD, MS
Director
Center for Research in Nutrition and Health
Instituto Nacional de Salud Publica
Cuernavaca, Mexico

Kim Robien, PhD, RD, CSO, FAND
Associate Professor
Department of Exercise and Nutrition Sciences
Department of Epidemiology and Biostatistics
Milken Institute School of Public Health
George Washington University
Washington, D.C., USA

**Fernando Rodríguez-Artalejo, MD, PhD**
Professor of Preventive Medicine and Public Health
School of Medicine
Universidad Autónoma de Madrid
Madrid, Spain

**Dora Romaguera, MSc, PhD**
Institut d’Investigació Sanitària de Palma (IdISPa) and CIBER-OBN
Hospital Universitari Son Espases, Unitat de Recerca
Palma de Mallorca, Spain

**Emilio Ros, MD, PhD**
Former Director, Lipid Clinic
Endocrinology & Nutrition Service
Hospital Clinic
CIBERObn, ISCIII, Spain
Barcelona, Spain

**Donald (Diego) Rose, PhD, MPH**
Professor and Head of Nutrition Section
School of Public Health and Tropical Medicine
Tulane University
New Orleans, Louisiana, USA

**Miguel Ruiz-Canela, PhD, MPH**
Associate Professor
Department of Preventive Medicine and Public Health
University of Navarra
Navarra, Spain

**Joan Sabaté, MD, DrPH**
Professor of Nutrition
School of Public Health
Loma Linda University
Loma Linda, California, USA

**Frank Sacks, MD, ScB**
Professor of Cardiovascular Disease Prevention
Department of Nutrition
Harvard T.H. Chan School of Public Health
Boston, Massachusetts, USA
Guillermo Saez Tormo, MD, PhD
Department of Biochemistry and Molecular Biology
Coordinator for International Relations and Mobility Programs
Faculty of Medicine and Odontontology
Service of Clinical Analysis
University Hospital Doctor Peset Aleixandre
University of Valencia
Valencia, Spain

Jordi Salas-Salvadó, MD, PhD
Professor of Nutrition
Director, Human Nutrition Unit
Department of Biochemistry & Biotechnology, IISPV
School of Medicine
Rovira i Virgili University
CIBERobn, Instituto Carlos III
Director, Centre Català de la Nutrició - Institut d'Estudis Catalans
Past President, Federation of Spanish Food, Nutrition and Dietetic Scientific Societies
Director, Red Iberoamericana RIBESMET
Chairman, INC - World Forum for Nutrition Research and Dissemination
Reus, Spain

Associate Professor of Preventive Medicine and Public Health
Department of Clinical Sciences
Universidad de las Palmas de Gran Canaria
Las Palmas, Spain

Wim H.M. Saris, MD, PhD
Professor of Human Nutrition
Department of Human Biology
NUTRIM: School of Nutrition and Translational Research
Maastricht University Medical Centre
Maastricht, The Netherlands

Dennis Savaiano, PhD, MS
Virginia C. Meredith Professor
Director, North Central Nutrition Education Center
Department of Nutrition Science
Purdue University
West Lafayette, Indiana, USA

Matthias B. Schulze, DrPH
German Institute of Human Nutrition
Department of Molecular Epidemiology
Nuthetal, Germany

**Ursula Schwab, PhD**
Associate Professor, Nutrition Therapy
Department of Public Health and Clinical Nutrition
School of Medicine
University of Eastern Finland, Kuopio Campus
Kuopio, Finland

**Marlene B. Schwartz, PhD**
Director
Rudd Center for Food Policy and Obesity
University of Connecticut
Storrs, Connecticut, USA

**Jacob C. Seidell, PhD**
Professor of Nutrition and Health/University Professor
VU University Amsterdam
Amsterdam, The Netherlands

**Lluis Serra-Majem, MD, MSc, PhD**
Professor of Public Health
Director, Public Health Nutrition Research Center, University of Barcelona
President, Nutrition Without Borders
University of Gran Canaria
Gran Canaria, Spain

**A. G. Shaper, FRCP, FRCPath, FFPHM**
Ex-director, British Regional Heart Study
University College of London
London, United Kingdom

**Anna Maria Siega-Riz, PhD**
Professor of Epidemiology and Nutrition
Associate Dean for Academic Affairs
Gillings School of Global Public Health
Chapel Hill, North Carolina, USA

**Lesley Schmidt Sindberg, MPH**
Senior Research Coordinator
Healthy Eating Research
University of Minnesota School of Public Health
St. Paul, Minnesota, USA
Jeremiah Stamler, MD
Professor Emeritus, Preventive Medicine and Epidemiology
Northwestern University Feinberg School of Medicine
Chicago, Illinois, USA

Meir Stampfer, MD, DrPH
Professor of Medicine, Harvard Medical School
Professor of Epidemiology and Nutrition, Harvard T.H. Chan School of Public Health
Associate Director, Channing Division of Network Medicine
Department of Medicine, Brigham and Women's Hospital
Boston, Massachusetts, USA

Marie-Pierre St.-Onge, PhD, FAHA
Assistant Professor, Department of Medicine
New York Obesity Research Center
Institute of Human Nutrition
College of Physicians & Surgeons

Professor, Department of Medicine
Harvard Medical School
Boston, Massachusetts, USA

**Alicja Wolk, DMSc**
Professor of Nutritional Epidemiology
Vice-chairman, Institute of Environmental Medicine
Head, Division of Nutritional Epidemiology
Karolinska Institutet
Stockholm, Sweden

**Jayne Woodside, PhD**
Nutrition and Metabolism Group
Centre for Public Health
Belfast, United Kingdom

**Kana Wu, MD, PhD**
Senior Research Scientist
Department of Nutrition
Harvard T.H. Chan School of Public Health
Boston, Massachusetts, USA

**Lisa R. Young, PhD, RD**
Adjunct Professor of Nutrition
New York University
New York, New York, USA

*2015 Dietary Guidelines Advisory Committee member*
Graduate Students

Stacy Blondin, MSPH
USDA Doctoral Fellow
ChildObesity180
Friedman School of Nutrition Science and Policy
Tufts University
Boston, Massachusetts, USA

Larissa Calancie
Doctoral Candidate - Nutrition Interventions and Policy
University of North Carolina Gillings School of Public Health
UNC Center for Health Promotion and Disease Prevention
Chapel Hill, North Carolina, USA

Christina Chauvenet, MSc
Doctoral Student
Maternal and Child Health
Royster Fellow
University of North Carolina Gillings School of Public Health
Chapel Hill, North Carolina, USA

Cesar Octavio Ramos Garcia, MHN, CN
Doctoral Student in Public Health Sciences
Director of Nutrition
Tonala University Center
University of Guadalajara
Guadalajara, Mexico

Violet Kiesel
Graduate Student
Purdue University
West Lafayette, Indiana, USA

Alexandra B. Morshed
Doctoral Student
Brown School
Washington University
St. Louis, Missouri, USA

Taulant Muka, MD, MSc, DSc
PhD Candidate, Erasmus MC, The Netherlands
Visiting Researcher at Harvard School of Public Health  
Boston, Massachusetts, USA

Luis A. Rodríguez, MPH, RD, CNSC  
Doctoral Student, Epidemiology & Translational Sciences  
UCSF School of Medicine  
Pediatric Clinical Dietitian, UCSF Benioff Children's Hospital  
San Francisco, California, USA

Christian Wright, MS  
Doctoral Candidate  
Department of Nutrition Science  
Laboratory of Nutrition, Fitness, and Aging  
NSGSO President  
Purdue University  
West Lafayette, Indiana, USA
