Question F6

In 2010, landmark legislation improved the National School Lunch and School Breakfast programs for more than 30 million school children across the country. As a result, school meals today have more fruits, vegetables and whole grains, as well as less salt. The Trump Administration has proposed rolling back some of the school nutrition standards. Please indicate to what extent you agree or disagree with the administration's actions.

Question F7

An elementary school lunch today has on average 1,200 mg of sodium - or about 2/3 of the recommended amount for a whole day. A new proposal by the Trump Administration would roll back progress being made to reduce the level of salt in meals served to children in schools. To what extent do you agree or disagree with the administration's actions?

Question F8

Nutrition experts recommend that children consume more whole grains and fewer refined grains compared to their average intake today. Schools must currently provide more whole grains in school meals, but the Trump Administration has proposed to allow fewer whole grains in school foods. Please indicate to what extent you agree or disagree with the administration's actions.
